

Comendo Selects Message Systems to Combat Spam and Provide Anti-Virus Protection

Fast Growing European IT Service Provider Chooses Message Systems to manage unwanted email for its 28,500 customers

COLUMBIA, MARYLAND – June 9, 2009 – Message Systems, the premier provider of holistic, fast and flexible message management solutions, announced today that Comendo, a leading IT security service provider in the Nordic region, selected Message Systems to manage and secure its email and messaging service offerings. Message Systems was also chosen for its ability to seamlessly integrate Comendo's unique anti-virus solution into their existing message management platform.

Based in Denmark, Comendo delivers Managed IT-services to more than 28,500 companies primarily in Europe. Comendo offers solutions within IT Security, VOIP and Cellular services, WAN (Internet Connectivity), Co-Location/Housing, Remote Backup and Hosting services.

In response to recent acquisitions and torrid customer growth, Comendo turned to Message Systems to manage abusive email for their rapidly expanding customer base. Message Systems, the first true carrier-class message management platform, was chosen by Comendo for its unparalleled experience in providing solutions that are high performance, flexible and extensible.

“Our aggressive growth rate required us to begin looking for more flexible and cost-effective ways to manage unwanted email,” said Martin Sundahl, CEO of Comendo A/S. “In addition we needed a vendor who could easily integrate with our existing anti-virus solution. Once we tested Message Systems’ platform and analyzed its performance and scalability, we knew we had found a solution as dynamic as our customer base. The ability to integrate business-driven functionality quickly with minimal effort will help drive market differentiation and brand loyalty for Comendo.”

Message Systems provides a comprehensive email solution for carriers and email receivers that deliver speed, high performance, manageability, extensibility and security at an affordable cost. Capable of delivering millions of unique messages per hour, Message Systems offers the fastest email solution on the market today. A comprehensive policy management module features a full threat prevention matrix and the ability to select best-in-class anti-spam and antivirus solutions to protect enterprise networks.

“Message Systems applauds Comendo for their tremendous growth and innovation as one of the leading IT Service Providers in Europe,” said George Schlossnagle, President and CEO of Message Systems. “We’re pleased that Comendo selected our solution as the gateway for their email platform and we’re committed to providing them with the most

cost-effective solution available on the market. Our goal is to provide Comendo with a bullet-proof solution that not only meets their current customer requirements but also evolves along with the email security needs of their business.”

About The Comendo Group

The Comendo Group is listed at the Nordic Stock Exchange (OMX ticker: COM) and we are proud to be one of the pioneers of the Managed Security Services industry in Scandinavia. Since the Company was founded in 2002, it has been our ambition to offer easy-to-use and easy-to-maintain IT Security for our customers, not neglecting the highest level of security in the market.

The Comendo Group consists of Comendo Security, Comendo Network, Comendo Telecom and Comendo Hosting/Backup. The Comendo Group offers solutions within IT Security, VOIP and Cellular services, WAN (Internet Connectivity), Co-Location/Housing, Remote Backup and Hosting services. To ensure the maximum availability for our customers, our advanced redundant network consists of 8 fiber connections and 3 high-security datacenters with full failover.

More than 375 partners sell our solutions and we protect more than 28,500 companies on a daily basis. In our offices located in Denmark, Sweden and Norway we employ close to 100 people - who all are experts in their field.

About Message Systems

Founded in 1997, Message Systems is a worldwide provider of message management solutions for email service providers (ESPs), Internet service providers (ISPs), social networks and large enterprises that need to manage large volumes of business-critical email. Through a combination of technology, partnerships and intellectual capital, Message Systems offers a family of software solutions and services that address the email infrastructure and deliverability needs for organizations ranging from e-commerce companies to the Global 2000. With the most powerful message management platform on the market, Message Systems gets billions of unique messages to the right place at the right time every day. Headquartered in Columbia, Maryland, Message Systems has a network of channel partners in North America, Europe and Asia Pacific.
